

### III. Transfer Statements

#### 1) break:

We can use break statement inside loops to break loop execution based on some condition.

Eg:

```
1) for i in range(10):
2)     if i==7:
3)         print("processing is enough..plz break")
4)         break
5)     print(i)
6)
7) D:\Python_classes>py test.py
8) 0
9) 1
10) 2
11) 3
12) 4
13) 5
14) 6
15) processing is enough..plz break
```

Eg:

```
1) cart=[10,20,600,60,70]
2) for item in cart:
3)     if item>500:
4)         print("To place this order insurance must be required")
5)         break
6)     print(item)
7)
8) D:\Python_classes>py test.py
9) 10
10) 20
11) To place this order insurance must be required
```
