

2. Multi Level Inheritance:

The concept of inheriting the properties from multiple classes to single class with the concept of one after another is known as multilevel inheritance

Eg:

```
1) class P:  
2)     def m1(self):  
3)         print("Parent Method")  
4) class C(P):  
5)     def m2(self):  
6)         print("Child Method")  
7) class CC(C):  
8)     def m3(self):  
9)         print("Sub Child Method")  
10) c=CC()  
11) c.m1()  
12) c.m2()  
13) c.m3()
```

Output:

Parent Method
Child Method
Sub Child Method

Multi – Level Inheritance
